SUMMARY

UX / Product Designer completing a B.A. in Experience Architecture. Collaborative academic experience in interviews, heuristic evaluation, information architecture, task mapping, and interface prototyping, supported by a frontend background and attention to accessibility.

EDUCATION

Michigan State University

Bachelor of Arts in Experience Architecture

Expected Graduation: December 2026

SELECTED DESIGN PROJECTS

D2L Redesign

Collaborative academic project · Four-person team

- Collaborated on heuristic evaluation and student/instructor task flows to explore assignment navigation, file review, and submission status.
- Developed sketches, interface iterations, and Figma prototype states with the team for assignment requirements, selected-file review, submission history, and rubric creation.

Community Spaces

Collaborative academic project · Four-person team

- Conducted participant interviews and collaborated on synthesizing findings into user needs and design opportunities.
- Developed task flows, sketches, and interface concepts with the team for event discovery, registration, and confirmation within a proposed community-space experience.

EXPERIENCE

Store Operations & Order Fulfillment Assistant

Family-owned Getir storehouse · Çanakkale, Turkey | June 2023-August 2024

- Prepared app orders and organized numbered pickup stations for motorcycle couriers.
- Received deliveries, restocked products, checked inventory and expiry dates, and handled missing items.
- Assigned staff tasks and oversaw daily operations when the owner was away; completed closing checks, cash reconciliation, cleaning, and securing the premises.

SKILLS

Design methods: Participant interviews, heuristic evaluation, information architecture, task-flow mapping, wireframing, interface prototyping
